Merchant Intelligence Platform for Cards Business — BR-01, BR-02, BR-03 Deep-Dive

BR Mapping Summary

BR	Requirement	Core Business Question	Primary Dashboard	Primary Output
BR-01	Merchant 360 Intelligence	Who is this merchant, what is their profile, behaviour, value, risk and growth opportunity?	Merchant 360 View / Mockup 2	Single merchant profile, revenue/transaction trend, customer demographics, affinity network, cross-sell and lending/risk view
BR-02	Merchant Segmentation	Which merchant groups matter, and how should they be targeted, priced, retained and grown?	Merchant Segmentation Dashboard	Revenue-based, business-size and growth-stage segments with migration and performance tracking
BR-03	Merchant Performance Dashboard	How is merchant/portfolio performance trending across sales, volume, customers and wallet share?	Executive / Performance Dashboard / Mockup 1	KPI tiles, trend charts, category and geography performance, merchant share and growth metrics

BR-01 Merchant 360 Intelligence

1. Understanding Summary

BR-01 establishes a single, comprehensive merchant profile by combining transaction, merchant master, location, customer, acquiring, credit, digital, loyalty and network data. It is the foundational "single source of truth" for merchant intelligence.

Business Purpose

- **Provide relationship managers and acquiring teams with a complete merchant view.**
- **Explain merchant revenue, transaction behaviour, customer base, geographic performance and growth potential.**
- **Detect churn risk, cross-sell opportunities, lending eligibility and partnership potential.**
- **Support data-driven merchant conversations, retention actions and acquisition targeting.**

Business Questions Answered

026 Hexaware Technologies Limited. All rights reserved

- **Who is the merchant?**
- **What is their revenue, transaction volume and average ticket size?**
- **Are they growing, stable or declining?**
- **Which customers spend with them?**
- **Which other merchants share the same customers?**
- **What banking, lending, rewards or partnership products can be cross-sold?**
- **What is their risk and lending score?**

Information Gaps Addressed

- **Data silos → unified merchant 360 view.**
- **Incomplete merchant view → transaction + master + geo + customer + acquiring + credit + digital + loyalty + network.**
- **Missed revenue opportunities → growth and cross-sell indicators.**
- **Competitive disadvantages → merchant benchmarking and wallet-share context.**
- **Unoptimized partnerships → affinity network and shared-customer analysis.**

Expected Outcomes

- **Higher merchant retention.**
- **Better cross-sell conversion.**
- **Improved acquiring revenue.**
- **Faster identification of high-potential merchants.**
- **Proactive churn management.**
- **New lending and partnership leads.**

2. Input Datasets Required

Dataset	Key Fields Required	Why Needed for BR-01
Core Transaction Dataset	Transaction ID, Card Number (Tokenized), Merchant ID, Merchant Name, MCC Code, Transaction Date & Time, Transaction Amount, Transaction Type, Authorization Status, Card Type, Payment Channel, Currency, Terminal ID	Revenue, volume, ticket size, customer activity, channel and card behaviour
Merchant Master Dataset	Merchant ID, Merchant Name, Merchant Category, MCC, Merchant Size, Annual Revenue, Number of Stores, Business Type,	Merchant profile, classification, lifecycle and acquiring context

026 Hexaware Technologies Limited. All rights reserved

	Onboarding Date, Relationship Manager, Acquiring Status	
Merchant Geo-Spatial Dataset	Merchant ID, Latitude, Longitude, City, State, PIN Code, Mall/Business Zone, Catchment Area	Location, catchment and regional performance
Customer Spending Dataset	Customer ID (Tokenized), Demographics, Income Band, Occupation, Transaction Frequency, Average Spend, Preferred Categories, Home Location	Customer demographics, spend pattern and merchant affinity
Merchant Network Ecosystem Dataset	Merchant A, Merchant B, Shared Customers, Transaction Overlap, Visit Sequence, Affinity Score	Partnership, co-marketing and shared-customer insight
Acquiring Business Dataset	Merchant ID, Acquirer Bank, POS Count, POS Revenue, MDR Revenue, Settlement Volume, Chargebacks	Acquiring performance, revenue and risk context
Merchant Credit & Lending Dataset	Merchant ID, Average Monthly Sales, Transaction Growth Rate, Cash Flow Stability, Settlement History, Existing Loans, Credit Score	Lending eligibility, credit risk and cash-flow health
Digital Engagement Dataset	Merchant Website, App Presence, Social Media Activity, Online Ratings, E-Commerce Capability, Digital Payment Adoption	Digital maturity and payment adoption insight
Competitive Intelligence Dataset	Competitor Merchant Name, Market Share, Branch Count, Customer Ratings, Traffic Indicators, Industry Growth Rate	Benchmarking and competitive positioning
Loyalty & Rewards Dataset	Merchant ID, Offer Type, Redemption Count, Campaighn Revenue, Repeat Visits, Customer Acquisition Rate	Merchant engagement, rewards and campaign performance
MCC Reference Dataset	MCC Code, Category Name, Industry Group	Standard classification and peer grouping

Critical MVP Datasets for BR-01

- **Core Transaction Data**
- **Merchant Master Data**
- **Merchant Location Data**

026 Hexaware Technologies Limited. All rights reserved

- **Customer Spend Data**
- **MCC Reference Data**
- **Acquiring Revenue Data**
- **Merchant Affinity Network Data**

3. KPIs for BR-01

KPI	Formula	Why This KPI (Use-Case Fit)
Merchant Revenue Growth %	((Current Period Revenue − Previous Period Revenue) / Previous Period Revenue) × 100	Answers "growth opportunity" — the single strongest signal of whether this merchant is growing, stable or declining.
Merchant Wallet Share %	Bank Transaction Volume / Total Merchant Transaction Volume × 100	Answers "value" and cross-sell potential — how much of this merchant's spend the bank already captures vs. opportunity headroom.
Merchant Attrition Rate	Lost Merchants / Active Merchants × 100	Answers "risk" — detects churn risk and triggers proactive retention action on the merchant profile.

4. Dashboard Requirements — Merchant 360 View

Dashboard Name

Merchant 360 View / Dashboard Mockup 2

Primary Users

- **Relationship Managers**
- **Merchant Acquiring Team**
- **Product Management Team**
- **Risk Management**
- **Retail / Corporate Banking**

Functional Requirements

- **Search and select a merchant by Merchant ID, name, category, MCC, location or relationship manager.**
- **Display a full merchant profile with master, acquiring, credit and digital attributes.**
- **Show revenue trend, transaction trend and KPI tiles.**
- **Show customer demographics, spend pattern and preferred categories.**
- **Show affinity network and shared-customer relationships.**

026 Hexaware Technologies Limited. All rights reserved

- Show cross-sell recommendations and next-best-action suggestions.
- Show risk, churn and lending score.
- Support time-period comparison: month, quarter, year, custom range.
- Support drill-down from summary KPI to transaction/customer detail.
- Apply filters: category, region, merchant size, acquiring status, card type, channel.
- Export dashboard views to PDF/Excel.
- Role-based access and tokenized customer/merchant data.

Dashboard Elements

Zone	Element	Type	Purpose
Header	Merchant Profile	Card / Header	Merchant ID, name, category, MCC, size, location, onboarding date, RM, acquiring status
KPI Row	Revenue Growth %, Transaction Volume Growth %, Average Ticket Size, Wallet Share %, Active Customers, Repeat Customers	KPI Tiles	Instant performance view
Trend Panel	Revenue Trend	Line Chart	Revenue month-over-month / year-over-year
Trend Panel	Transaction Trend	Line / Bar Chart	Transaction count and value trend
Customer Panel	Customer Demographics	Bar / Pie / Table	Age, income, occupation, location
Network Panel	Affinity Network	Graph / Table	Merchant A–Merchant B shared customers and affinity score
Recommendation Panel	Cross-sell Recommendations	Table	Product, offer, probability, expected value
Risk Panel	Risk & Lending Score	Gauge / Card	Credit score, cash-flow stability, churn risk

026 Hexaware Technologies Limited. All rights reserved

Alert Panel	Alerts	List	Revenue drop, inactivity, churn risk, cross-sell trigger
Footer	Export / Filters	Controls	Period, category, region, segment, channel

BR-02 Merchant Segmentation

1. Understanding Summary

BR-02 automatically classifies merchants into meaningful segments so the bank can target, price, retain and grow merchants more effectively. Segmentation is based on revenue, business size and growth stage.

Business Purpose

- **Replace manual and static merchant grouping with automated segmentation.**
- **Enable differentiated acquiring, pricing, campaign and relationship strategies.**
- **Identify high-value, high-growth and at-risk merchant groups.**
- **Improve acquisition targeting and cross-sell conversion.**
- **Support portfolio management and executive reporting.**

Segmentation Dimensions

Dimension	Segments
Revenue Based	Platinum, Gold, Silver, Bronze
Business Size	Enterprise, Mid-Market, SMI, Micro
Growth Stage	Emerging, Growth, Mature, Declining

Business Questions Answered

- **Which merchants are Platinum / Gold / Silver / Bronze?**
- **Which are Enterprise, Mid-Market, SMI or Micro?**
- **Which merchants are Emerging, Growth, Mature or Declining?**
- **How are segments migrating over time?**
- **Which segments are growing, churning or underperforming?**
- **Where should acquisition, cross-sell and retention efforts focus?**

Information Gaps Addressed

- **Limited segmentation → automated revenue, size and growth segmentation.**

026 Hexaware Technologies Limited. All rights reserved

- **Poor targeting → segment-specific acquisition and campaign logic.**
- **Missed revenue opportunities → high-growth and high-value segment detection.**
- **Unoptimized partnerships → segment-level partnership and affinity analysis.**

Expected Outcomes

- **Better merchant acquisition targeting.**
- **Improved cross-sell and campaign ROI.**
- **Early churn detection by segment.**
- **Higher-value relationship management.**
- **More precise pricing and product strategy.**

2. Input Datasets Required

Dataset	Key Fields Required	Why Needed for BR-02
Merchant Master Dataset	Merchant ID, Merchant Name, Merchant Category, MCC, Merchant Size, Annual Revenue, Number of Stores, Business Type, Onboarding Date, Acquiring Status	Base segmentation by revenue and size
Core Transaction Dataset	Merchant ID, Transaction Amount, Transaction Date & Time, Transaction Type, Card Type, Payment Channel	Revenue, volume, growth and activity signals
Acquiring Business Dataset	Merchant ID, POS Count, POS Revenue, MDR Revenue, Settlement Volume, Chargebacks	Acquiring value and profitability segmentation
Merchant Geo-Spatial Dataset	Merchant ID, City, State, PIN Code, Mall/Business Zone, Catchment Area	Geographic segmentation and regional performance
Customer Spending Dataset	Customer ID, Income Band, Transaction Frequency, Average Spend, Preferred Categories	Customer-value segmentation and merchant attractiveness
Merchant Credit &	Average Monthly Sales, Transaction Growth Rate, Cash Flow Stability, Credit Score	Growth-stage and risk segmentation

026 Hexaware Technologies Limited. All rights reserved

Lending Dataset		
Digital Engagement Dataset	**Website, App Presence, Social Media Activity, Online Ratings, E-Commerce Capability, Digital Payment Adoption**	**Digital maturity segmentation**
Merchant Network Ecosystem Dataset	**Merchant A, Merchant B, Shared Customers, Affinity Score**	**Partnership segmentation and cluster analysis**
Loyalty & Rewards Dataset	**Offer Type, Redemption Count, Campaighn Revenue, Repeat Visits, Customer Acquisition Rate**	**Engagement and rewards segmentation**
MCC Reference Dataset	**MCC Code, Category Name, Industry Group**	**Category-level segmentation and peer grouping**

Critical MVP Datasets for BR-02

- **Merchant Master Data**
- **Core Transaction Data**
- **Acquiring Revenue Data**
- **Merchant Location Data**
- **Customer Spend Data**
- **Merchant Credit & Lending Data**
- **MCC Reference Data**

3. KPIs for BR-02

KPI	Formula	Why This KPI (Use-Case Fit)
Active Merchant Count by Segment	Distinct active merchants in segment	Defines the segment (size and activity) — the base for targeting and portfolio weighting.
Merchant Revenue Growth %	((Current Period Revenue − Previous Period Revenue) / Previous Period Revenue) × 100	Drives "grown" strategy — shows which segments are expanding or contracting over time.

026 Hexaware Technologies Limited. All rights reserved

Merchant Attrition Rate	Lost Merchants / Active Merchants × 100	Drives "retained" strategy — surfaces churn-risk segments that need intervention.

4. Dashboard Requirements — Merchant Segmentation Dashboard

Dashboard Name

Merchant Segmentation Dashboard

Primary Users

- **Cards Business Head**
- **Merchant Acquiring Team**
- **Payments Strategy Team**
- **Product Management Team**
- **Marketing Team**
- **Data Analytics Team**

Functional Requirements

- **Display merchant distribution by revenue segment, business size and growth stage.**
- **Show segment migration over time.**
- **Compare segment performance against prior periods.**
- **Drill down from segment to merchant list and merchant 360 view.**
- **Filter by period, category, region, revenue band, business size, growth stage, acquiring status.**
- **Highlight high-growth, high-value and churn-risk segments.**
- **Show cross-sell and partnership opportunity by segment.**
- **Export segment reports.**
- **Align segmentation with campaign, pricing and RM workbench.**

Dashboard Elements

Zone	Element	Type	Purpose

026 Hexaware Technologies Limited. All rights reserved

Header	Segment Filters	Controls	Revenue, size, growth, category, region, period
KPI Row	Active Merchants, Revenue Growth %, Attrition Rate, Acquisition Rate, Wallet Share %	KPI Tiles	Segment portfolio health
Distribution Panel	Revenue Segmentation	Pie / Bar Chart	Platinum, Gold, Silver, Bronze split
Distribution Panel	Business Size Segmentation	Bar Chart	Enterprise, Mid-Market, SMI, Micro
Distribution Panel	Growth Stage Segmentation	Stacked Bar / Pie	Emerging, Growth, Mature, Declining
Migration Panel	Segment Migration Matrix	Heatmap / Table	Movement between segments over time
Performance Panel	Segment Performance Table	Table	Revenue, volume, ticket size, wallet share, churn
Opportunity Panel	Top Growth Merchants	Table	High-potential acquisition / cross-sell targets
Risk Panel	Churn-Risk Segments	Table / Alerts	Segments needing retention action
Partnership Panel	Affinity by Segment	Table / Graph	Co-marketing and partnership opportunity
Footer	Export / Drill-down	Controls	Download and navigate to merchant 360

BR-03 Merchant Performance Dashboard

1. Understanding Summary

BR-03 provides the KPI-driven performance dashboard for merchants and the merchant portfolio. It tracks total sales, transaction value, volume, average ticket size, revenue growth, active customers, repeat customers and merchant share. It is the main performance monitoring view for executives, acquiring teams, product teams and relationship managers.

Business Purpose

- **Monitor merchant and portfolio performance against targets.**
- **Track revenue, transaction, customer and wallet-share KPIs.**
- **Identify top and underperforming merchant categories and geographies.**

026 Hexaware Technologies Limited. All rights reserved

- **Support executive decision-making and acquiring strategy.**
- **Provide trend and comparison views for merchant growth and retention.**

Business Questions Answered

- **What are total sales, transaction value and transaction volume?**
- **What is the average ticket size?**
- **How is revenue growing by merchant, category and region?**
- **How many active and repeat customers are there?**
- **What is the bank's merchant wallet share?**
- **Which categories and geographies are driving growth?**
- **Which merchants need intervention?**

Information Gaps Addressed

- **Static reporting → dynamic KPI dashboard.**
- **Delayed action → near real-time / daily performance monitoring.**
- **Lack of merchant benchmarking → category and geographic comparisons.**
- **Missed revenue opportunities → growth and wallet-share tracking.**
- **Competitive disadvantages → merchant share and peer performance.**

Expected Outcomes

- **Faster issue detection.**
- **Better acquisition and retention decisions.**
- **Improved acquiring revenue.**
- **Higher wallet share.**
- **Stronger merchant performance management.**

2. Input Datasets Required

Dataset	Key Fields Required	Why Needed for BR-03
Core Transaction Dataset	Transaction ID, Merchant ID, Transaction Date & Time, Transaction Amount, Transaction Type, Authorization Status, Card Type, Payment Channel, Currency	Total sales, transaction value, volume, average ticket size

026 Hexaware Technologies Limited. All rights reserved

Merchant Master Dataset	Merchant ID, Merchant Name, Merchant Category, MCC, Merchant Size, Annual Revenue, Onboarding Date, Acquiring Status	Merchant dimension and segmentation context
Merchant Geo-Spatial Dataset	Merchant ID, City, State, PIN Code, Mall/Business Zone, Catchment Area	Geographic performance
Customer Spending Dataset	Customer ID, Transaction Frequency, Average Spend, Preferred Categories, Home Location	Active customers, repeat customers, spend behaviour
Acquiring Business Dataset	Acquirer Bank, POS Count, POS Revenue, MDR Revenue, Settlement Volume, Chargebacks	Acquiring revenue and profitability
Loyalty & Rewards Dataset	Offer Type, Redemption Count, Campaighn Revenue, Repeat Visits, Customer Acquisition Rate	Campaign and repeat-visit performance
Competitive Intelligence Dataset	Competitor Merchant Name, Market Share, Branch Count, Customer Ratings, Traffic Indicators, Industry Growth Rate	Benchmarking and merchant share
MCC Reference Dataset	MCC Code, Category Name, Industry Group	Category performance and peer grouping

Critical MVP Datasets for BR-03

- **Core Transaction Data**
- **Merchant Master Data**
- **Merchant Location Data**
- **Customer Spend Data**
- **Acquiring Revenue Data**
- **MCC Reference Data**

026 Hexaware Technologies Limited. All rights reserved

3. KPIs for BR-03

KPI	Formula	Why This KPI (Use-Case Fit)
Total Sales	Sum of transaction amount in period	The primary executive revenue KPI — portfolio scale and performance.
Transaction Volume	Count of transactions in period	Activity level — the volume dimension of the use case.
Merchant Wallet Share %	Bank Transaction Volume / Total Merchant Transaction Volume × 100	Market competitiveness — wallet-share capture, the executive share metric.

4. Dashboard Requirements — Merchant Performance Dashboard

Dashboard Name

Merchant Performance Dashboard / Executive Merchant Intelligence Overview / Mockup 1

Primary Users

- **Cards Business Head**
- **Merchant Acquiring Team**
- **Paymants Strategy Team**
- **Product Management Team**
- **Relationship Managers**
- **Finance Team**

Functional Requirements

- **Display KPI tiles for total merchants, active merchants, revenue growth, wallet share and acquiring revenue.**
- **Show merchant growth trend over time.**
- **Show top 10 merchant categories.**
- **Show merchant distribution by geography.**
- **Show partnership ROI trend.**

026 Hexaware Technologies Limited. All rights reserved

- Support period comparison: month, quarter, year, custom range.
- Drill down from KPI tile or chart to merchant list and Merchant 360.
- Filter by category, region, segment, channel, card type, acquiring status.
- Export dashboard to PDF / Excel.
- Align KPI definitions with finance and data governance.
- Include alerting for significant revenue, volume or churn deviation.

Dashboard Elements

Zone	Element	Type	Purpose
Header	KPI Tiles	KPI Cards	Total Merchants, Active Merchants, Revenue Growth %, Wallet Share %, Acquiring Revenue
Trend Panel	Merchant Growth Trend	Line Chart	Merchant count and revenue growth over time
Category Panel	Top 10 Merchant Categories	Bar Chart	Category contribution and growth
Geography Panel	Merchant Distribution by Geography	Map / Bar / Table	Regional performance
Partnership Panel	Partnership ROI Trend	Line / Bar Chart	Campaign and partnership effectiveness
Performance Panel	Merchant Performance Table	Table	Revenue, volume, ticket size, growth, wallet share
Customer Panel	Active vs Repeat Customers	Bar / Line Chart	Customer engagement trend
Alert Panel	Performance Alerts	List	Revenue drop, volume drop, churn risk
Footer	Filters / Export	Controls	Period, category, region, segment, channel

Consolidated KPI Formula Definitions

KPI	Formula

026 Hexaware Technologies Limited. All rights reserved

Merchant Revenue Growth (%)	((Current Period Revenue – Previous Period Revenue) / Previous Period Revenue) × 100
Merchant Transaction Volume Growth (%)	((Current Txn Count – Previous Txn Count) / Previous Txn Count) × 100
Average Ticket Size	Total Transaction Value / Total Number of Transactions
Merchant Acquisition Rate	New Merchants Acquired / Total Target Merchants × 100
Cross-sell Conversion Rate	Cross-sell Accepted Offers / Total Offers × 100
Merchant Wallet Share (%)	Bank Transaction Volume / Total Merchant Transaction Volume × 100
Merchant Attrition Rate	Lost Merchants / Active Merchants × 100
Partnership Campaighn ROI	(Campaighn Revenue – Campaighn Cost) / Campaighn Cost × 100
Customer-Merchant Affinity Score	Weighted score based on shared customers, frequency and spend overlap
Acquiring Revenue Growth (%)	((Current MDR Revenue – Previous MDR Revenue) / Previous MDR Revenue) × 100
Merchant Lending Conversion Rate	Approved Merchant Loans / Eligible Merchants × 100
Total Sales	Sum of transaction amount in period
Total Transaction Value	Sum of transaction amount in period
Transaction Volume	Count of transactions in period
Active Customers	Distinct customers with at least one transaction in period
Repeat Customers	Customers with more than one transaction in period
Merchant Share	Bank Transaction Volume / Total Merchant Transaction Volume × 100

Star Schema / Data Model Mapping

026 Hexaware Technologies Limited. All rights reserved

BR	Fact Tables	Dimension Tables	Logical Link
BR-01	Fact_Transactions, Fact_Merchant_Revenue, Fact_Customer_Spend, Fact_Merchant_Affinity, Fact_Acquiring_Revenue	Dim_Merchant, Dim_Customer, Dim_Time, Dim_Location, Dim_Card, Dim_Channel, Dim_Merchant_Category, Dim_Partner	Merchant 360 joins transactions, customer spend, affinity, acquiring and dimensions
BR-02	Fact_Merchant_Revenue, Fact_Transactions, Fact_Acquiring_Revenue, Fact_Campaigns	Dim_Merchant, Dim_Time, Dim_Location, Dim_Merchant_Category, Dim_Partner	Segmentation primarily uses Dim_Merchant + revenue/transaction facts
BR-03	Fact_Transactions, Fact_Merchant_Revenue, Fact_Acquiring_Revenue	Dim_Merchant, Dim_Time, Dim_Location, Dim_Merchant_Category, Dim_Card, Dim_Channel	Performance dashboard aggregates facts by merchant, time, location, category and channel

Critical MVP Datasets for BR-01–BR-03

Dataset	BR-01	BR-02	BR-03
Card Transaction Data	Yes	Yes	Yes
Merchant Master Data	Yes	Yes	Yes
Merchant Location Data	Yes	Yes	Yes
Customer Spend Data	Yes	Yes	Yes
MCC Reference Data	Yes	Yes	Yes
Acquiring Revenue Data	Yes	Yes	Yes
Merchant Affinity Network Data	Yes	Yes	Optional
Merchant Credit & Lending Data	Yes	Yes	Optional
Digital Engagement Data	Yes	Yes	Optional
Loyalty & Rewards Data	Yes	Yes	Yes
Competitive Intelligence Data	Yes	Optional	Yes

Recommended Implementation Notes

1. **BR-01 should be the master merchant view and should be linked from every other dashboard.**
2. **BR-02 should feed targeting, pricing, campaign, retention and RM workbench logic.**
3. **BR-03 should be the executive and operational KPI dashboard, with drill-down into BR-01 and BR-02.**
4. **Dashboard Mockup 3 — Partnership & Cross-Sell Opportunities should be treated as a specialized extension of BR-01 and BR-02.**
5. **All KPIs should have governed definitions, refresh frequency, data owner and finance validation.**
6. **Customer and card data must remain tokenized, and access should be role-based.**

026 Hexaware Technologies Limited. All rights reserved
